Heated Holding Cabinet

HHC 900 Full size

HHC 900 full-size heated holding cabinet with Countdown Timer control

Henny Penny heated holding cabinets keep hot foods safe and appetizing prior to serving.

The 900 series holding cabinets were developed to hold large quantities of pressure-fried chicken for long periods of time without sacrificing freshness or presentation. The key is even heating and constant circulation. Dual fans and ventilated side racks allow hot, moist air to circulate evenly throughout the cabinet. This helps keep practically any menu item hot and tasty until serving, and translates into higher food quality with less waste throughout the day.

Henny Penny holding cabinets also improve equipment and labor utilization. With proper holding capability, foodservice operators can cook in quantity before peak periods and stock service cases directly from the holding cabinet.

The HHC 900 is a full size, high volume, mobile heated holding cabinet with dual doors and a single control panel. Available Countdown Timer control (CDT) lets you program individual holding times for different items. High visibility time-remaining display and timer alert signal lets employees monitor holding while accomplishing other tasks.

Fully insulated cabinet and tightsealing doors help you enjoy the benefits of high quality holding while using very little energy. Many operators see a net reduction in overall kitchen energy costs.

Partial pan removal, self-closing doors and magnetic closures contribute to convenient work flow and energy savings.

Standard Features

- Choice of Countdown Timer control Dual heavy-duty blower motors or Electro-mechanical control
- Countdown Timer control features 13 independent programmable timers with:
 - Single switch start/stop/abort, manual override and power-out memory
